this book covers foreign exchange options from the point of view of the finance practitioner it contains everything a quant or trader working in a bank or hedge fund would need to know about the mathematics of foreign exchange not just the theoretical mathematics covered in other books but also comprehensive coverage of implementation pricing and calibration with content developed with input from traders and with examples using real world data this book introduces many of the more commonly requested products from fx options trading desks together with the models that capture the risk characteristics necessary to price these products accurately crucially this book describes the numerical methods required for calibration of these models an area often neglected in the literature which is nevertheless of paramount importance in practice thorough treatment is given in one unified text to the following features correct market conventions for fx volatility surface construction adjustment for settlement and delayed delivery of options pricing of vanillas and barrier options under the volatility smile barrier bending for limiting barrier discontinuity risk near expiry industry strength partial differential equations in one and several spatial variables using finite differences on nonuniform grids fourier transform methods for pricing european options using characteristic functions stochastic and local volatility models and a mixed stochastic local volatility model three factor long dated fx model numerical calibration techniques for all the models in this work the augmented state variable approach for pricing strongly path dependent options using either partial differential equations or monte carlo simulation connecting mathematically rigorous theory with practice this is the essential guide to foreign exchange options in the context of the real financial marketplace

for a first course in materials sciences and engineering taught in the departments of materials science mechanical civil and general engineering this text provides balanced current treatment of the full spectrum of engineering materials covering all the physical properties applications and relevant properties associated with engineering materials it explores all of major categories of materials while also offering detailed examinations of a wide range of new materials with high tech applications publisher s website

this textbook is designed for introductory statics courses found in mechanical engineering civil engineering aeronautical engineering and engineering mechanics departments it better enables students to learn challenging material through effective efficient examples and explanations

for undergraduate introductory or survey courses in electrical engineering electrical engineering principles and applications 5 e helps students learn electrical engineering fundamentals with minimal frustration its goals are to present basic concepts in a general setting to show students how the principles of electrical engineering apply to specific problems in their own fields and to

enhance the overall learning process circuit analysis digital systems electronics and electromechanics are covered a wide variety of pedagogical features stimulate student interest and engender awareness of the material s relevance to their chosen profession

contemporary engineering economics 5 e is intended for undergraduate engineering students taking introductory engineering economics while appealing to the full range of engineering disciplines for which this course is often required industrial civil mechanical electrical computer aerospace chemical and manufacturing engineering as well as engineering technology this edition has been thoroughly revised and updated while continuing to adopt a contemporary approach to the subject and teaching of engineering economics this text aims not only to build a sound and comprehensive coverage of engineering economics but also to address key educational challenges such as student difficulty in developing the analytical skills required to make informed financial decisions
