nineteenth century america saw profound changes in the ways people viewed their bodies their health and their corporeal connection to their environments though much of the writing about bodies was produced by men vigorous reforms focuses on the understudied literary history of how women came to understand physicality and its connection to their everyday lives the introduction of physical education allowed women to conceive their own and others bodies not as static entities but as adaptable to their own needs goals and labor jess libow also shows the limits of the science of the era since bodily differences were often understood as biologically determined theories of health defined womanhood in terms of racialized bodily abilities for example settler colonial ideology coded native women as deteriorating due to their uncivilized ways of life and proponents of slavery insisted that black women's inherent strength made them suitable for enslavement drawing on a wide ranging archive of ideas about exercise hygiene and nutrition libow argues that women's writing about health was fundamental to the development of what we now think of as american feminism
